DESCRIPTORS	*Educational Resources; Elementary Secondary Education; *Indexes; Instructional Materials; Reference Materials
IDENTIFIERS	*National Center for Education Statistics

ABSTRACT

The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education. The second of a series of indices to NCES "Issue Briefs" and "Indicators of the Month" is presented here. "Issue Briefs" are short-format publications that present information on education topics of current interest. "Indicators of the Month" analyze key data that measure the health of education, monitor important developments, and show trends in major aspects of education. The index includes all "Issue Briefs" and "Indicators of the Month" currently available from the first edition in 1992 to the most recent edition of June 1998. Topics covered include race/ethnicity; teachers, administrators, and teaching issues; schools and schooling; school finance; student characteristics, course taking, and aspirations; educational outcomes; and international assessments. The titles, issues dates, and reference numbers of 76 briefs are listed here. The NCES addresses high-priority education data needs, provides indicators of education status and trends, and reports data to the Department of Education, to Congress, to the States, and to education policy makers and the general public. The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a Congressional mandate to collect, collate, analyze and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist State and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

The Center's activities are designed to address high priority education data needs; provide consistent, reliable, complete and accurate indicators of education status and trends; and report timely, useful and high quality data to the Department, the Congress, the States, other education policymakers, practitioners, data users, and the general public.

We strive to make our products available in a variety of formats and language that is appropriate to a variety of audiences. You, as our "customer," are the best judge of our success in communicating our information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

This is the second of a series of indices to NCES Issue Briefs and Indicators of the Month. Issue Briefs are short-format publications that present information on education topics of current interest. Indicators of the Month analyze key data that measure the health of education, monitor important developments, and show trends in major aspects of education. Unlike most other statistics, an indicator is policy-relevant and problem -oriented; it usually incorporates a standard against which to judge progress or regression. Indicators cannot, however, identify causes or solutions and should not be used to draw conclusions without other evidence. This index includes all Issue Briefs and Indicators of the Month currently available from the first edition in 1992 through the most recent editions of June 1998. To obtain a copy of a listed Issue Brief, or an Indicator of the Month, or to be placed on the mailing list to receive future Issue Briefs or Indicators of the Month, phone ED Pubs at their toll-free number, 1-877-4ED-PUBS. When requesting a specific Issue Brief or Indicator of the Month please be sure to include the NCES number and full title.
